FALL DIGGING HAZARDS

Certain trees have a high risk of failure when dug in the fall. Peat & Son Nursery identifies these trees and advises against the risk. However, upon your request, we will dig this material, but assume no responsibility for its survival.

We wish to inform customers that it is very risky to transplant the following list of trees, Bare Root or B&B, in the fall.

Betula varieties	Liquidambar varieties
Carpinus varieties	Liriodendron tulipifera
Celtis varieties	Magnolia
Cercidiphyllum varieties	Malus-in leaf
Cercis	Nyssa sylvatica
Cornus florida	Ostrya
Crataegus varieties	Platanus
Cryptomeria japonica	Prunus - All stone fruits
Cupressocyparis leylandi	Pyrus varieties
Fagus varieties	Quercus - except Palustris
Halesia varieties	Salix - weeping varieties
Ilex opaca varieties	Tilia tomentosa varieties
Ilex - Evergreen varieties	Zelkova varieties
Lagerstromia indica
